

Paul Rasmus

**Chief
Project Management Office
Information Technology Division
Bureau of Safety and Environment Enforcement
U.S. Department of the Interior**

Paul Rasmus is the Chief of the Project Management Office for the U.S. Department of the Interior, Information Technology Division, Bureau of Safety and Environmental Enforcement in New Orleans, Louisiana. He oversees various information technology development projects, and is currently project manager for the Company and Bonding development project. In addition, Mr. Rasmus has been instrumental in the e-Gov initiative for the BSEE/BOEM.

His previous major development effort was the eWell project. eWell is a comprehensive Internet based permitting and reporting system for collecting information concerning well operations for each wellbore and well completion. eWell was turned on in production in 2002.

Before joining BSEE, Mr. Rasmus was an IT programmer for the Corps of Engineers in New Orleans and is currently an adjunct professor at Tulane University. He received his Bachelors of Science from University of Texas at El Paso, Masters of Engineering from Tulane and is a certified Project Management Professional.
