

The United States Department of Interior has created two new, independent agencies to carry out the offshore energy management and enforcement functions that were under the jurisdiction of the Bureau of Ocean, Energy Management, Regulation and Enforcement.

The **Bureau of Ocean Energy Management** is responsible for managing development of the nation's offshore resources in an environmentally and economically responsible way. Functions include: Leasing, Plan Administration, Environmental Studies, National Environmental Policy Act Analysis, Resource Evaluation, Economic Analysis and the Renewable Energy Program.

The **Bureau of Safety and Environmental Enforcement** enforces safety and environmental regulations. Functions include: All field operations including Permitting and Research, Inspections, Offshore Regulatory Programs, Oil Spill Response, and newly formed Training and Environmental Compliance functions.
