

Biography - Ronald Kaltenbaugh

Mr. Ronald Kaltenbaugh graduated from University of Southwestern Louisiana in 1987 with a BS in Petroleum Engineering. The first twelve years of his career were spent in the mid-stream sector working with Transco Energy, Tenneco Energy, and TransCanada USA Inc. During his tenure with these companies, Ron was responsible for engineering, project management, operations, and regulatory for operated assets and new business opportunities which included gas processing, oil and gas gathering pipelines (both onshore and offshore), and gas treating facilities. From these companies, Ron transitioned into a commercial role with TransCanada USA Inc. managing three gas processing plants and a fractionator in Louisiana. Ron's next step in his career led him to Unocal/Chevron in the upstream commercial organization in various leadership roles in managing owned/operated and non-operated mid-stream assets. Currently Ron works in Chevron's Upstream Organization as a Commercial Coordinator with responsibilities in the export solutions for Chevron's GOM DeepWater Major Capital Projects. Ron has over thirty-three years of industry experience ranging from technical to commercial.
