

Warren Williamson - Biography

Warren Williamson is Information Technology Advisor and Petroleum Engineer in the Bureau of Safety and Environmental Enforcement (BSEE), Department of the Interior. He is responsible for providing strategic vision to the Regional Director on information technology-related issues, including new initiatives, policy, budget and organizational issues. He is also the chief liaison between BSEE's Gulf of Mexico Region and the Information Technology Division regarding engineering and geo-science applications.

Mr. Williamson is a native of New Orleans and holds a Bachelor of Science in Mechanical Engineering from University of New Orleans. He has worked for BSEE (and MMS) for more than 35 years as a Petroleum Engineer in a variety of offices, and has helped develop many of the computer applications used by BSEE, including the "eWell" online electronic well permitting and reporting system, BSEE's Online Data Center, and numerous internal modules. He is currently "champion" of BSEE's new TIMSWeb portal.
